List of Contents

NUMBER 1

V. Kushawaha and **A. Michael**	1	Discharge emissions from NaN_3 related to the HgBr laser
J. Haekel and **H. Mäder**	9	Self-broadening and shift for the $J = 0$–1 rotational lines of $CH_3C^{14}N$ and $CH_3C^{15}N$ using the microwave transient emission technique
A. Goldman, M. Dang-Nhu, and **J. P. Bouanich**	17	Ethane 3 μm spectral clusters of atmospheric interest
Kouichi Kamiuto	23	Radiative transfer through a randomly-packed bed of spheres
E. C. Rea, Jr., A. Y. Chang, and **R. K. Hanson**	29	Collisional broadening of the $A^2\Sigma^+ \leftarrow X^2\Pi$ (0, 0) band of OH by H_2O and CO_2 in atmospheric-pressure flames
J. P. Bouanich, G. Blanquet, and **J. Walrand**	43	Collisional linewidths of OCS broadened by Ar
A. Bauer, M. Godon, M. Kheddar, and **J. M. Hartmann**	49	Temperature and perturber dependences of water vapor line-broadening. Experiments at 183 GHz; calculations below 1000 GHz
R. L. Dougherty	55	Radiative transfer in a semi-infinite absorbing/scattering medium with reflective boundary
K. Jeß, V. Helbig, F. Greiner, J. Kaspareit, V. Rohde, and **T. Weirauch**	69	A multi-parameter chi-square fitting procedure and applications in spectroscopy
C. Payne	79	Atmospheric retraction in a spherically stratified medium
Software Survey Section	I	

NUMBER 2

M. Czajkowski, E. Lisicki, and **N. Hedgecock**	85	Total out-of-doublet quenching cross-sections for Cs-atoms in $n^2S_{1/2}$, n^2D_J and n^2F_J states in collision with Xe atoms
Vivek Bakshi and **R. J. Kearney**	93	Effect of power variation on thermal plasma optical diagnostic data
Lai-Wa Tang, Shachar Nadler, and **Stephen J. Daunt**	97	Tunable diode laser measurements of absolute line strengths in the $2\nu_2$ band of N_2O near 8 μm
G. C. Pomraning	103	The Milne problem in a statistical medium

R. D. M. Garcia and **C. E. Siewert** 117 The F_N method for radiative transfer models that include polarization effects

J. Grandy, Vivek Bakshi, R. J. Kearney, and **J. Batdorf** 147 Temperature fluctuations in an atmospheric pressure d.c. thermal plasma

V. S. Starovoitov, S. A. Trushin, V. V. Churakov, and **V. F. Pivovarchik** 153 Dipole moments of laser transitions of isotopic carbon dioxide. Experiment and theory

H. O. Di Rocco, G. Bertuccelli, J. Reyna Almandos, F. Bredice, and **M. Gallardo** 161 Line shifts of Kr II, Kr III, and Xe III in high-current, pinched discharges

Software Survey Section I

NUMBER 3

John D. Hey 167 Further properties of the generalized functions of Holtsmark, and Chandrasekhar and von Neumann

P. Varanasi and **S. Chudamani** 173 Measurement of pressure-induced shifts of infrared lines with a tunable diode laser

S. Nowak, J. A. M. van der Mullen, B. van der Sijde, and **D. C. Schram** 177 Spectroscopic determination of electron density and temperature profiles in an inductively-coupled argon plasma

Chih-Yang Wu 187 Exact integral formulation of anisotropic scattering in an arbitrary enclosure

Richard I. Klein, John I. Castor, Anne Greenbaum, Derek Taylor, and **Pieter G. Dykema** 199 A new scheme for multi-dimensional line transfer—I. Formulation and 1-D results

S. K. Barman 221 Approximation to the H-function for anisotropic scattering

L. Scaffardi, D. Schinca, J. O. Tocho, and **H. F. Ranea-Sandoval** 225 Spectroscopic study of population inversion mechanisms in diatomic-molecule lasers

I. M. Gaisinsky and **E. A. Oks** 235 Extension of the theory for the intensities of dipole forbidden spectral lines in a plasma

Software Survey Section I

NUMBER 4

H. M. J. Willems, K. Yuasa, B. van der Sijde, D. C. Schram, and **J. A. M. van der Mullen** 251 Laser fluorescence experiments with a pulsed dye laser in an argon plasma

H. K. Roscoe and **R. J. Wells**	259	The variation of pressure, temperature and transmission within a pressure modulator: measurements with a high-compression modulator
K. Y. Cho and **T. L. Eddy**	287	Collisional-radiative modeling with multitemperature thermodynamic models
Binshen Meng	303	The flight-out-of-view effect in radiative lifetime measurements of excited atoms by the method of laser-induced fluorescence
José Manuel P. Serrão	307	Absorption spectrum of magnesium
Yukap Hahn	315	Dielectronic recombination rates for the Fe ions
F. Bombarda, R. Giannella, E. Källne, and **G. J. Tallents**	323	Ion temperature measurement from Doppler broadening of He-like nickel lines
Software Survey Section	I	

NUMBER 5

P. Varanasi and **S. Chudamani**	335	Measurements of collision-broadened line widths in the ν_4-fundamental band of $^{12}CH_4$ at low temperatures
P. Varanasi and **S. Chudamani**	345	Absolute intensity measurements in the ν_4-fundamental band of $^{12}CH_4$ at planetary atmospheric temperatures
P. Varanasi and **S. Chudamani**	351	Tunable diode laser measurements of line widths in the ν_1-fundamental band of $^{14}N_2{}^{16}O$ at atmospheric temperatures
P. Varanasi and **S. Chudamani**	359	Line strength measurements in the ν_1-fundamental band of $^{14}N_2{}^{16}O$ using a tunable diode laser
P. van der Westhuizen, T. C. Kotze, and **P. B. Kotze**	363	Lifetime measurements for levels in P IV
Vivek Bakshi and **Robert J. Kearney**	369	An investigation of local thermodynamic equilibrium in an argon plasma jet at atmospheric pressure
Antonio Rodríguez and **José Campos**	377	Transition probabilities in the Cl II spectrum
S. T. Thynell	383	Radiative transfer in absorbing, emitting and linearly anisotropically scattering spherical media
Sunggi Chung, Chun C. Lin, and **Edward T. P. Lee**	397	Transition probabilities of spectral lines of singly ionized atomic oxygen (OII)
Software Survey Section	I	

NUMBER 6

Y. Bayazitoglu and **P. Krause**	419	An improved profile for the solution of radiative transfer by Galerkin's method
M. Osterhold, G. Himmel, and **H. Schlüter**	425	Experimental investigation of saturated laser absorption in the Stark-broadened profile of the Balmer line D_6
P. N. Milford, B. J. O'Mara, and **J. E. Ross**	433	Measurement of relative intensities of Fe I lines of astrophysical interest
J. Huennekens and **T. Colbert**	439	On radiative transport of the resonance lines of sodium
Richard W. Liebermann	447	Selected transition probabilities of Sc I
M. H. Haggag, H. M. Machali, and **M. Madkour**	461	Chandrasekhar's X- and Y-functions
C. E. Siewert and **W. L. Dunn**	467	The searchlight problem in radiative transfer
J. L. Deuzé, M. Herman, and **R. Santer**	483	Fourier series expansion of the transfer equation in the atmosphere–ocean system
Software Survey Section	I
